As we sit amongst ourselves on this Orwellian Election Eve, enlightenment dawns. We the American public, are about to elect a president on image alone. A nice little package complete with style, compassion, and fluff.....Sounds like a lot of that shit you will likely hear on so called A.O.R. radio. Taint music its friggin product to be marketed and sold like Big Macs. This isnt meant to be an overly pretentious tirade extoilling the problem with music today or the role of college radio in these flipped out times. All we are trying to say is LET US AND OUR JOCKS DECIDE WHAT WE WANT TO PLAY. Our ears are specially trained to discover those artists that are contributing positively to the art form. Whether its Lets Active trying to perfect pop, or Negative-land exploring the virgin territories of noise collages, the bottom line is the same... ?What are they/you doing for the form ? ?And Babys? And Babys.
